

A Brief History: Workshop on the Statistical Analysis of Multi-outcome Data (SAM)

History

1. Originated in 2010, discussing with John O'Quigley
2. Focus areas: joint model of multiple outcomes, recurrent events, multivariate longitudinal data
3. Held in even years
4. Great talks, great place, great meeting

First Workshop (SAM 2012)

1. Curie Institute (*Institut Curie*) in Paris, France
2. Two day workshop July 9-10, 2012
3. Twenty four invited speakers (8 sessions)
4. Around 100 participants

Second Workshop (SAM 2014)

1. In the University of Cambridge, UK
2. Two day workshop June 30-July 1, 2014
3. Twenty four invited speakers (8 sessions)

Third Workshop (SAM 2016)

1. Renmin (People's) University of China, Beijing
2. Two day workshop July 4-5, 2016
3. Add sessions on e.g., high dimensional multi-outcome data

Fourth Workshop (SAM 2018)

1. Washington University in St. Louis
2. Two day workshop June 10-11, 2018
3. Add a poster session for graduate students and poster award for students.

Fifth Workshop (SAM 2024)

1. Originally planned in Emei, Sichuan, China in July 2020
2. Cancelled due to COVID-19
3. Cancelled again in 2022 due to COVID-19
4. Finally comes to the beautiful city of Salzburg!
5. Held in University of Salzburg in July 2024!

Sixth Workshop (SAM 2026)

Acknowledgements

- University of Bordeaux for providing the venue
- Ruiwen Zhou for designing the marvelous website!
