

# PROGRAM

## 6<sup>th</sup> International Workshop on Statistical Analysis on Multi-Outcome data

June 29-July 1st, 2026, Bordeaux, FR

**DAY1**  
**June 29, 2026**

**8:30-9:00**     *Welcome*

**9:00-9:15**     Introduction ( ...)

**9:15-10:15**     One invited KEYNOTE Speech / 50' talk + 10'discussion

**Title Navigating the Crossroads of Statistics, Generative AI, and Genomic Health**  
Xihong Lin, Biostatistics, Harvard T.H. Chan School of Public Health

**10:15-10:45**     *Coffee break*

**10:45-12:25**     [4 Parallel invited SESSIONS] 20' talk + 5'discussion

**Session 1: Deep learning in survival analysis**

Organizer: Lei Liu     [lei.liu@wustl.edu](mailto:lei.liu@wustl.edu)

- Jon Steingrimsson     [jon\\_steingrimsson@brown.edu](mailto:jon_steingrimsson@brown.edu)  
**Title: Deep Learning with Time-to-event Outcomes**
- Xingqiu Zhao     [xingqiu.zhao@polyu.edu.hk](mailto:xingqiu.zhao@polyu.edu.hk)  
**Title: Robust Estimation and Inference for Accelerated Failure Time Models via Double Machine Learning**
- Peter X Song     [pxsong@umich.edu](mailto:pxsong@umich.edu)  
**Title: Neural Network Machine Regression (NNMR): A Deep Learning Framework for Uncovering High-order Synergistic Effects**
- Kevin He     [kevinhe@umich.edu](mailto:kevinhe@umich.edu)  
**Title: Flexible Deep Learning Techniques for Survival Analysis with Data Integration**

**Session 2: Early or intercurrent events in (long-term outcome) clinical trials**

Organizer: Catherine Legrand     [catherine.legrand@uclouvain.be](mailto:catherine.legrand@uclouvain.be)

- Philippe Lambert (Uliège, UClouvain)     [p.lambert@uliege.be](mailto:p.lambert@uliege.be)  
**Title: Joint Modeling of Longitudinal Health-Related Quality of Life Data in the Presence of Competing Dropout Risks**
- Georgios Kazantzidis     [georgios.kazantzidis@roche.com](mailto:georgios.kazantzidis@roche.com)  
**Title: A Joint Multi-State Model for Causal Mediation Analysis adjusting for treatment switching in Oncology**
- Luc Boone (EORTC)     [luc.boone@eortc.org](mailto:luc.boone@eortc.org)  
**Title: Estimation of inverse probability of censoring weights using shared parameter joint models for longitudinal and survival outcomes.**
- Tomasz Burzykowski     [tomasz.burzykowski@iddi.com](mailto:tomasz.burzykowski@iddi.com)

**Title: Early-outcome-based interim analyses in randomized clinical trials with long-term clinical endpoints**

**Session 3: Trustworthy AI and Statistical Innovation for Complex Health Data**

Organizer: Ying Wei

[yw2148@cumc.columbia.edu](mailto:yw2148@cumc.columbia.edu)

- Tianying Wang [Tianying.Wang@colostate.edu](mailto:Tianying.Wang@colostate.edu)

**Title: Confounder Missingness in EHR Comparative Effectiveness: MI or PS Calibration?**

- Kaizheng Wang [kaizheng.wang@columbia.ca](mailto:kaizheng.wang@columbia.ca)

**Title: Quantifying Fidelity in AI Persona Simulations**

- Nan Linnlin [Nan.Linnlin@wustl.edu](mailto:Nan.Linnlin@wustl.edu)

**Title: Trajectory Clustering via Spatial-Graph and LLM-Semantic Embeddings**

- Jinbao Chen [jinboche@upenn.edu](mailto:jinboche@upenn.edu)

**Title: A Semiparametric Method for Addressing Under-Diagnosis Using Electronic Health Record Data**

**Session 4: Joint models with Bayesian inference**

Organizer: Sangita Kulathinal (Finland)

[sangita.kulathinal@helsinki.fi](mailto:sangita.kulathinal@helsinki.fi)

- Etienne Sebag [etienne.sebag@helsinki.fi](mailto:etienne.sebag@helsinki.fi)

**Title: Bayesian estimating Transition Rates in Two-State Non-Homogeneous Markov Jump Processes with Intermittent Observations: An Honest Time Data Augmentation Approach**

- Marion keriou [marion.keriou@inserm.fr](mailto:marion.keriou@inserm.fr)

**Title: A Bayesian partition model for multivariate functional data: discovering biological pathways by modelling the time course of gene expression level**

- Trinh Dong Huu [trinh.dong@ncl.ac.uk](mailto:trinh.dong@ncl.ac.uk)

**Title: Double inverse probability weighting for modeling sparsely measured longitudinal markers in presence of left and right truncation by death**

- Satrajit Roychoudhury [satrajit.roychoudhury@pfizer.com](mailto:satrajit.roychoudhury@pfizer.com)

**Title: Robust dynamic borrowing designs for randomized basket trials: a case study from the ultra-rare invasive mold infections**

**12:25-13:30 Lunch and POSTERS SESSION**

**13:30-15:10 [4 Parallel invited SESSIONS] 20' talk + 5'discussion**

**Session 5: Some Advanced Statistical Learning Methods for Modern Scientific Data**

Organizer: Lexin Li

[lexinli@berkeley.edu](mailto:lexinli@berkeley.edu)

- Ji Zhu [jizhu@umich.edu](mailto:jizhu@umich.edu)

**Title: Modeling non-uniform hypergraphs using determinantal point processes.**

- Yuhua Zhu [yuhua.zhu@stat.ucla.edu](mailto:yuhua.zhu@stat.ucla.edu)

**Title: Structure-aware model-free algorithms for continuous-time reinforcement learning.**

- Moo Kyung Chung [mkchung@wisc.edu](mailto:mkchung@wisc.edu)

**Title: Covariate-adjusted topological inference and learning.**

- Junwei Lu [junweilu@hsph.harvard.edu](mailto:junweilu@hsph.harvard.edu)

**Affiliation: Ranking inference for human feedback tuning in large language models.**

**Session 6: Joint models for risk prediction according to marker variability**

Organizer: Helene Jacqmin-Gadda

[Helene.Jacqmin-Gadda@u-bordeaux.fr](mailto:Helene.Jacqmin-Gadda@u-bordeaux.fr)

- Jessica Barrett [jessica.barrett@mrc-bsu.cam.ac.uk](mailto:jessica.barrett@mrc-bsu.cam.ac.uk)

**Title: Flexible Bayesian semi-parametric approaches for modelling within-individual variability in joint models**

- Leonie Courcoul [leonie.courcoul@u-bordeaux.fr](mailto:leonie.courcoul@u-bordeaux.fr)

**Title: Joint models with heteroscedastic residual variance: an application to the impact of blood pressure variability on competing health events.**

- Jianxin Pan, China [jianxinpan@uic.edu.cn](mailto:jianxinpan@uic.edu.cn)

**Title: Measuring Biomarker Variability for Survival Data**

- Michael Elliott [mrelliot@umich.edu](mailto:mrelliot@umich.edu)

**Title: Joint Modeling of Multiple Longitudinal Biomarkers and Survival Outcomes via Threshold Regression: Variability as a Predictor**

### **Session 7: Recent Developments in Survival Analysis**

Organizer: Yifan Cui [yifanc095@gmail.com](mailto:yifanc095@gmail.com)

- Ingrid Van Keilegom [ingrid.vankeilegom@kuleuven.be](mailto:ingrid.vankeilegom@kuleuven.be)

**Title: On an extension of the Cox model for time-dependent covariates under dependent censoring with unknown association**

- Donglin Zeng [dzeng@umich.edu](mailto:dzeng@umich.edu)

**Title: Simultaneous Confidence Bands for Time-Varying Hazard Ratios with Interval-Censored Data**

- Danyu Lin [lin@bios.unc.edu](mailto:lin@bios.unc.edu)

**Title: Checking the Cox Proportional Hazards Model with Interval-Censored Data**

- Zhe Fei [zhfei@ucr.edu](mailto:zhfei@ucr.edu)

**Title: Adaptive Mixture-of-Experts Transformers for Joint Modeling of Irregular Longitudinal and Survival Data**

### **Session 8: Trustworthy analysis of healthcare and medical data**

Organizer: Fang Liu [Fang.Liu.131@nd.edu](mailto:Fang.Liu.131@nd.edu)

- Chuang Hong [chuan.hong@duke.edu](mailto:chuan.hong@duke.edu)

**Title: An Agentic AI System for Multi-Framework Communication Coding**

- Yajuan Si [yajuan@umich.edu](mailto:yajuan@umich.edu)

**Title: Towards Differentially Private Finite Population Estimation: An Approach Based on Survey Weight Regularization**

- Hongyuan Cao [hcao@fsu.edu](mailto:hcao@fsu.edu)

**Title: Kernel meets sieve: transformed hazards models with sparse longitudinal covariates**

- Xinghua Mindy Shi [mindyshi@temple.edu](mailto:mindyshi@temple.edu)

**Title: Mathematical Foundations of Generative AI for Human Genetics and Epigenetics**

**15:10-15:40 Coffee break**

**15:40-17:20 [4 Parallel invited SESSIONS] 20' talk + 5'discussion**

### **Session 9: Recent developments in reinforcement learning methods for precision medicine**

Organizer: Donglin Zeng [dzeng@umich.edu](mailto:dzeng@umich.edu)

- Alex Luedtke [aluedtke@uw.edu](mailto:aluedtke@uw.edu)

**Title: DoubleGen: Debaised Generative Modeling of Counterfactuals**

- Xiwei Tang [Xiwei.Tang@UTDallas.edu](mailto:Xiwei.Tang@UTDallas.edu)  
**Title: Reinforcement Learning with Event-Driven Dynamics**
- Nilanjana Laha [nilanjanaaa.laha@gmail.com](mailto:nilanjanaaa.laha@gmail.com)  
**Title: Model-free dynamic treatment regimes with arbitrary number of treatments and stages**
- Yuanjia Wang [yw2016@cumc.columbia.edu](mailto:yw2016@cumc.columbia.edu)  
**Title: Learning Optimal Early Decision Treatment Rules with Multi-domain Intermediate Outcomes**

#### **Session 10: Distributional and Quantile Regressions for complex response data**

Organizer: Antoine Barbieri [antoine.barbieri@u-bordeaux.fr](mailto:antoine.barbieri@u-bordeaux.fr)

- Angelo Alcaraz [angelo.alcaraz@ens-paris-saclay.fr](mailto:angelo.alcaraz@ens-paris-saclay.fr)  
**Title: On asymmetric Laplace regression models: application to trophic diversity**
- Lei Liu [lei.liu@wustl.edu](mailto:lei.liu@wustl.edu)  
**Title: Efficient Estimation in Quantile Mixed Models via Smooth Check-Loss Approximation**
- Mouna Abed [mouna.abed@u-bordeaux.fr](mailto:mouna.abed@u-bordeaux.fr)  
**Title: A joint model based on distributional regression to study the link between blood pressure and the risk of cerebral vasospasm.**
- Gauthier Thurin [Gauthier.thurin@ens.fr](mailto:Gauthier.thurin@ens.fr)  
**Title: Optimal-transport based conformal prediction**

#### **Session 11: Innovative Statistical Methods for Complex Health and Biomedical Data**

Organizer: Mei Hao [hao.mei@ruc.edu.cn](mailto:hao.mei@ruc.edu.cn)

- Hao Zhang [haozhang@arizona.edu](mailto:haozhang@arizona.edu)  
**Title: A Performance-Based Framework for Transfer Learning Measurement and Guidance**
- Kai Zhang [zhangk@email.unc.edu](mailto:zhangk@email.unc.edu)  
**Title: BELIEF in Dependence**
- Lexin Lilixinli [Lilixinli@berkeley.edu](mailto:Lilixinli@berkeley.edu)  
**Title: Brain Encoding and Decoding: Some Examples**
- Hao Mei [hao.mei@ruc.edu.cn](mailto:hao.mei@ruc.edu.cn)  
**Title: Functional Latent Space Model for Time-Varying Networks: Application to Taiwan Administrative Claims Data**

#### **Session 12: High-dimensional surrogate markers in multi-outcome settings**

Organizer: Boris Hejblum [boris.hejblum@u-bordeaux.fr](mailto:boris.hejblum@u-bordeaux.fr)

- Layla Parast [parast@austin.utexas.edu](mailto:parast@austin.utexas.edu)  
**Title: Resilience Measures for the Surrogate Paradox**
- Florian Stijven (PhD de Geert à KU Leuven) [florian.stijven@kuleuven.be](mailto:florian.stijven@kuleuven.be)  
**Title: Meta-Analytic Evaluation of Complex Surrogate Endpoints based on the Surrogate Index**
- Tianxi Cai [tcai@hsph.harvard.edu](mailto:tcai@hsph.harvard.edu)  
**Title: Stable Multi-Surrogate Transformation for Robust and Generalizable Surrogacy**
- Peter Gilbert [peterg@uw.edu](mailto:peterg@uw.edu)  
**Title: Surrogate endpoint evaluation for outcomes with high-dimensional features, with application to vaccines**

**DAY2 -**  
**June 30, 2026**

**8:30-9:00**

**Welcome**

**9:00-10:40**

**[4 Parallel invited SESSIONS]** *20' talk + 5'discussion*

**Session 13: Recent advances in transfer learning for biomedical applications**

Organizer: Lan Luo

[ll1118@sph.rutgers.edu](mailto:ll1118@sph.rutgers.edu)

- Rui Duan [rduan@hsph.harvard.edu](mailto:rduan@hsph.harvard.edu)

**Title: Unsupervised Aggregation of Multiple Learning Algorithms**

- Emily C Hector [ehector@umich.edu](mailto:ehector@umich.edu)

**Title: Heterogeneity-adaptive meta-analysis**

- Tian Gu [tg2880@cumc.columbia.edu](mailto:tg2880@cumc.columbia.edu)

**Title: Hierarchical Projection for Adaptive Knowledge Transfer**

- Ling Zhou [zhouling@swufe.edu.cn](mailto:zhouling@swufe.edu.cn)

**Title: On a synergistic learning phenomenon in nonparametric domain adaptation**

**Session 14: Clustering from multivariate data**

Organizer: Anais Rouanet

[anais.rouanet@u-bordeaux.fr](mailto:anais.rouanet@u-bordeaux.fr)

- Julien Jacques [julien.jacques@univ-lyon2.fr](mailto:julien.jacques@univ-lyon2.fr)

**Title: Clustering of Multivariate Longitudinal Data of mixed type**

- Julie Fendler (MRC Cambridge) [julie.fendler@mrc-bsu.cam.ac.uk](mailto:julie.fendler@mrc-bsu.cam.ac.uk)

**Title: Consensus Monte Carlo for mixtures of categorical distributions**

- Anais Rouanet [anais.rouanet@u-bordeaux.fr](mailto:anais.rouanet@u-bordeaux.fr)

**Title: Non-parametric clustering of multivariate longitudinal data with variable selection: Identifying sub-phenotypes of Alzheimer's Disease**

- Qendresa Selimi. [yzheng@fredhutch.org](mailto:yzheng@fredhutch.org)

**Title: A Dynamic Joint Latent Class Model With Time-Dependent Transition Probabilities**

**Session 15: The use of functional data analysis in multivariate settings**

Organizer: Corentin Segalas

[corentin.segalas@u-bordeaux.fr](mailto:corentin.segalas@u-bordeaux.fr)

- Luo Xiao [lxiao5@ncsu.edu](mailto:lxiao5@ncsu.edu)

**Title: Functional joint model for longitudinal and survival data with a functional covariate with application to a longitudinal study of objective physical activity**

- Andrew Simpkin [andrew.simpkin@universityofgalway.ie](mailto:andrew.simpkin@universityofgalway.ie)

**Title: Estimation and Application of Derivative Multivariate Functional Principal Component Analysis**

- Corentin Segalas [corentin.segalas@u-bordeaux.fr](mailto:corentin.segalas@u-bordeaux.fr)

**Title: Random Survival Forest for the prediction of survival outcomes from time-varying outcomes using functional principal component analysis**

- Sophie Dabo [sophie.dabo@univ-lille.fr](mailto:sophie.dabo@univ-lille.fr)  
**Title: Preliminary Test Estimation in ULAN models for Functional Data**

### Session 16: New advances in survival analysis and machine learning

Organizer: Yichuan Zhao [yichuan@gsu.edu](mailto:yichuan@gsu.edu)

- Edsel Pena [pena@stat.sc.edu](mailto:pena@stat.sc.edu)  
**Title: Prediction Machines Based on Concordance Correlation**
- Yifan Cui [yifanc095@gmail.com](mailto:yifanc095@gmail.com)  
**Title : Double Machine Learning of Continuous Treatment Effects with General Instrumental Variables**
- Liang Lilli15@mdanderson.org  
**Title: Modeling the Association Between Multivariate Nonlinear Longitudinal Data and Survival Outcome: A Measurement Error Perspective**
- Yichuan Zhao [yichuan@gsu.edu](mailto:yichuan@gsu.edu)  
**Title: Novel empirical likelihood method for the cumulative hazard ratio under stratified Cox models**

### Coffee break

11:10-12:50

[4 Parallel invited SESSIONS] 20' talk + 5'discussion

### Session 17: Statistical Learning for Complex Data

Organizer: Xingqiu Zhao [xingqiu.zhao@polyu.edu.hk](mailto:xingqiu.zhao@polyu.edu.hk)

- Jinfeng Xu [jinfenxu@cityu.edu.hk](mailto:jinfenxu@cityu.edu.hk)  
**Title: Causal inference with outcome dependent sampling and mismeasured outcome**
- Qixian Zhong [qxzhong@xmu.edu.cn](mailto:qxzhong@xmu.edu.cn)  
**Title: Semiparametric Inference for Functional Survival**
- Meiling Hao [meilinghao@uibe.edu.cn](mailto:meilinghao@uibe.edu.cn)  
**Title: Conditional inference for high-dimensional multi-omics survival data**
- Xiangbin Hu [xiang-bin.hu@connect.polyu.hk](mailto:xiang-bin.hu@connect.polyu.hk)  
**Title: Deep Conditional Generative Learning for Optimal Individualized Treatment Rules**

### Session 18: Software for the Analysis of Multi-Outcome Models (INLAjoint, JMBayes2, frailtypack ...)

Organizer: Denis Rustand [denis.rustand@u-bordeaux.fr](mailto:denis.rustand@u-bordeaux.fr)

- Elias Krainski [elias.krainski@kaust.edu.sa](mailto:elias.krainski@kaust.edu.sa)  
**Title: graphpcor: Models for correlation matrices based on graphs.**
- Virginie Rondeau [Virginie.Rondeau@inserm.fr](mailto:Virginie.Rondeau@inserm.fr)  
**Title: Assessing surrogacy from joint modeling and mediation analysis when surrogates are either censored event times or longitudinal biomarker: cancer application**
- Janet van Niekerk [janet.vanniekerk@kaust.edu.sa](mailto:janet.vanniekerk@kaust.edu.sa)  
**Title: INLAjoint and beyond: INLA for multi-outcome modeling.**
- Pedro Afonso [p.mirandaafonso@erasmusmc.nl](mailto:p.mirandaafonso@erasmusmc.nl)  
**Title: The JMBayes2 R package for joint models of longitudinal and time-to-event data: From flexible fitting to dynamic prediction and validation**

### Session 19: Advanced Analytical Methods in Multi-outcome Data

Organizer: Lei Liu

[lei.liu@wustl.edu](mailto:lei.liu@wustl.edu)

- Yun Li [Yun.Li@Pennmedicine.upenn.edu](mailto:Yun.Li@Pennmedicine.upenn.edu)

**Title: Confounder Missingness in EHR Comparative Effectiveness: MI or PS Calibration?**

- Grace Y. Yi [gyi5@uwo.ca](mailto:gyi5@uwo.ca)

**Title: Function-on-Scalar Regression with Ultra high-Dimensional Error-Prone Covariates**

- Douglas Schaubel [douglas.schaubel@pennmedical.upenn.edu](mailto:douglas.schaubel@pennmedical.upenn.edu)

**Title: Time-varying frailty model for analyzing recurrent/terminal event data**

- Yi Li [yili@umich.edu](mailto:yili@umich.edu)

**Title: Inference for Deep Neural Network Estimators**

### Session 20: Frontiers in Statistical Methodologies for Precision Medicine Research

Organizer: Yuanjia Wang

[yw2016@cumc.columbia.edu](mailto:yw2016@cumc.columbia.edu)

- Erica Moodie [erica.moodie@mcgill.ca](mailto:erica.moodie@mcgill.ca)

**Title: Estimating the optimal allocation of kidneys in the presence of competing risks from clustered data**

- Ashken Ertefie [Ashkan.Ertefaie@PennMedicine.upenn.edu](mailto:Ashkan.Ertefaie@PennMedicine.upenn.edu)

**Title: A structural nested rate model for estimating the effects of time-varying exposure on recurrent event outcomes**

- Yuan Chen [cheny19@mskcc.org](mailto:cheny19@mskcc.org)

**Title: Learning Locally Interpretable Individualized Treatment Rules**

- Yinjun Zhao [yz3503@cumc.columbia.edu](mailto:yz3503@cumc.columbia.edu)

**Title: An Integrative Approach for Subtyping Mental Disorders Using Multimodal Data**

13:00-14:00

**Lunch and POSTERS SESSION**

14:00-15:40

**[4 Parallel invited SESSIONS]** 20' talk + 5'discussion

### Session 21: Statistical and machine learning methods for complex biomedical data

Organizer: QI Long, [qlong@pennmedicine.upenn.edu](mailto:qlong@pennmedicine.upenn.edu)

and Kevin He, [kevinhe@umich.edu](mailto:kevinhe@umich.edu)

- Hongzhe Li. [hongzhe@upenn.edu](mailto:hongzhe@upenn.edu)

**Title: A Robust Local Frechet Regression Using Unbalanced Neural Optimal Transport with Applications to Dynamic Single-cell Genomics Data**

- Sandra Safo [ssafo@umn.edu](mailto:ssafo@umn.edu)

**Title: iDeepViewLearn+: Interpretable AI for Robust and Fair Multimodal Data Integration**

- Ali Shojaie [ashojaie@uw.edu](mailto:ashojaie@uw.edu)

**Title: GLM Inference with AI-Generated Synthetic Data Using Misspecified Linear Regression**

- Lili Zhao [zhaolili@northwestern.edu](mailto:zhaolili@northwestern.edu)

**Title: Distributed Kaplan-Meier Curves**

### Session 22: Causal inference in presence of truncation by death

Organizer: Cecile Proust-Lima

[cecile.proust-lima@u-bordeaux.fr](mailto:cecile.proust-lima@u-bordeaux.fr)

- Daniel Nevo (Israel) [danielnevo@gmail.com](mailto:danielnevo@gmail.com)

**Title: Causal effects on non-terminal event time with application to antibiotic usage and future resistance**

- Maria Josefsson [maria.josefsson@umu.se](mailto:maria.josefsson@umu.se)

**Title: Flexible Bayesian Causal Inference for Longitudinal Health Data with Attrition and Mortality**

- Linda Valeri (NYC) [lv2424@cumc.columbia.edu](mailto:lv2424@cumc.columbia.edu)

**Title: A path-specific effect approach to mediation analysis with time-varying mediators and time-to-event outcomes accounting for competing risks**

- Stijn Vansteelandt [stijn.vansteelandt@ugent.be](mailto:stijn.vansteelandt@ugent.be)

**Title: *Evaluating Treatment Effects in Longitudinal Trials with Truncation by Death: An Assumption-Lean Approach***

**Session 23: Innovative Statistical Methods for Longitudinal and Survival Analysis in Medical Studies**

Organizer: Yanqing Sun [yasun@charlotte.edu](mailto:yasun@charlotte.edu)

- Lang Wu [lang@stat.ubc.ca](mailto:lang@stat.ubc.ca)

**Title: Joint models in longitudinal studies for efficient and robust inferences**

- Ronghui (Lily) Xu [rxu@health.ucsd.edu](mailto:rxu@health.ucsd.edu)

**Title: Learning Treatment Effects under Covariate Dependent Left Truncation and Right Censoring**

- Wenqing He [whe@stats.uwo.ca](mailto:whe@stats.uwo.ca)

**Title: Boosting methods for interval censored data with regression and classification**

- Yanqing Sun [yasun@charlotte.edu](mailto:yasun@charlotte.edu)

**Title: Estimation and Inference of Semiparametric Temporal Intensity Models for Recurrent Events with Application to a Malaria Vaccine Trial**

**Session 24: New Estimation and Inference Methods for Analyzing Composite Survival Outcomes**

Organizer: Ying Ding [YINGDING@pitt.edu](mailto:YINGDING@pitt.edu)

- Chen Hu [huc@jhu.edu](mailto:huc@jhu.edu)

**Title: On statistical inference of multiple competing risks in oncology clinical trials**

- Yu Cheng [yucheng@pitt.edu](mailto:yucheng@pitt.edu)

**Title: Win odds for Sequential Multiple Assignment Randomized Trials**

- Chung-Chou H. Chang [changj@pitt.edu](mailto:changj@pitt.edu)

**Title: A Bayesian Multi-Arm Multi-Stage Adaptive Framework for Composite Endpoints in Critical Care Trials**

- TBD

**Title: TBD**

**15:40-16:10**

**Coffee break**

**16:10-17:50**

**[4 Parallel invited SESSIONS] 20' talk + 5'discussion**

**Session 25: Machine Learning and Survival Analysis**

Organizer: Jiaoguo Sun [sunj@missouri.edu](mailto:sunj@missouri.edu)

- Yu Gu [yugu@hku.hk](mailto:yugu@hku.hk)

**Title: Semiparametric Functional Multi-State Models: Estimation and Testing with Application to Alzheimer's Disease**

- Yuanyuan Lin [ylin@sta.cuhk.edu.hk](mailto:ylin@sta.cuhk.edu.hk)

**Title: A Data-Augmented Contrastive Learning Approach to Nonparametric Density Estimation**

- Li Liu [lliu.math@whu.edu.cn](mailto:lliu.math@whu.edu.cn)

**Title: Automatic structure identification and variable selection for additive accelerated failure time model with ultra high dimensional covariates**

- Wen Su [w.su@cityu.edu.hk](mailto:w.su@cityu.edu.hk)

**Title: Semiparametric Causal Inference for Right-Censored Outcomes with Many Weak Invalid Instruments**

#### **Session 26: Area of causal inference**

Organizer: Cheng Zheng [cheng.zheng@unmc.edu](mailto:cheng.zheng@unmc.edu)

- Ying Zhang. [ying.zhang@unmc.edu](mailto:ying.zhang@unmc.edu)

**Title: Joint Analysis of Multivariate Longitudinal Data and Interval-Censored Event Time Data with Application to Huntington's Disease Progression**

- Ran Dai. [ran.dai@unmc.edu](mailto:ran.dai@unmc.edu)

**Title: Model-free High Dimensional Mediator Selection with False Discovery Rate Control**

- Mladen Kolar. [mkolar@marshall.usc.edu](mailto:mkolar@marshall.usc.edu)

**Title: Confidence Sets for Causal Orderings**

- Youngjoo Cho [yvc5154@konkuk.ac.kr](mailto:yvc5154@konkuk.ac.kr)

**Title: Doubly robust inference for the heterogeneous treatment effect of multiple treatments on time-to-event outcomes**

#### **Session 27: Joint analysis of time-to-event or longitudinal markers in the presence of mortality as a competing risk**

Organizer: Sebastien HANEUSE [shaneuse@hsph.harvard.edu](mailto:shaneuse@hsph.harvard.edu)

- Eleni-Rosalina Andrinopoulou [eleni.r.andrinopoulou@gsk.com](mailto:eleni.r.andrinopoulou@gsk.com)

**Title: Challenges and Opportunities in Joint Modelling of Multiple Longitudinal and Survival Outcomes**

- Daniels, Michael J., [mdaniels@stat.ufl.edu](mailto:mdaniels@stat.ufl.edu)

**Title: A Bayesian Nonparametric Approach for Semi-Competing Risks with Application to Cardiovascular Health**

- Sebastien Haneuse [shaneuse@hsph.harvard.edu](mailto:shaneuse@hsph.harvard.edu)

**Title: A novel framework for Joint prediction of longitudinal markers and death**

- Sangita Kulathinal [sangita.kulathinal@helsinki.fi](mailto:sangita.kulathinal@helsinki.fi)

**Title: Nonparametric estimation of the joint and conditional survival functions of the time to an event of interest and associated integrated covariate processes**

#### **Session 28 : Nonparametric and semiparametric modeling for the analysis of complex data**

Organizer: Zhezhen Jin [zj7@cumc.columbia.edu](mailto:zj7@cumc.columbia.edu)

- Shanshan Ding [sding@udel.edu](mailto:sding@udel.edu)

**Title: Robust causal effect estimation in high-dimensional survival analysis using sufficient dimension reduction**

- Xuewen Lu [xlu@ucalgary.ca](mailto:xlu@ucalgary.ca)

**Title: Spike-and-Slab Group Lasso for High-Dimensional Cox Proportional Hazards Models.**

|                    |                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
